Going Green? With Your Pool

Going Green

Everywhere you look more and more people are going green when it comes to their household purchases. Swimming pools use an alarmingly high amount of energy to run. With the cost of everything going up, going Green is really the only way to go.

According to Green Living Online, "With just over eight million pools in the U.S. and more than 600,000 in Canada, there is a growing awareness that single owner pools may not be the most environmentally friendly form of recreation. They use a lot of electricity to circulate the water through filters and pumps.

Acqua Nita Services, Inc is aware of this and is in full swing with a variety of Alternative and Low Energy Efficient products for pool owners looking to "Go Green". We encourage the use of environmentally responsible swimming pool products by incorporating, resourceful, energy-efficient products, and to your, swimming pools.

Going Green with your swimming pool is not just a hot trend, it will save you money. Products such as TightWatt Digital Pool Timer that will reduce costs by utilizing its self-adjusting pool filter run-times year-round. Pool Owners' can become less dependent on high output products using outdated technologies. They can upgrade to more environmentally friendly, cost saving, "Green" products.

Almost every manufacturer has developed enhanced products with low Amperage or Solar pumps to decrease energy bills from homeowners and to increase the value of homes living green.

Acqua Nita Services, Inc. can assist you in any of your GO GREEN swimming pool remodeling needs.
