## Hurricane Preparedness

May 25th marked the beginning of Florida Hurricane Preparedness Week. Preparing now will enable you to better protect your family, your home and your livelihood, allowing you to recover much more quickly.

Through the Division of Emergency Management, the state offers a very useful Web based tool to help business owners and families create customized disaster plans. To create a plan for your business and family, go to [www.FloridaDisaster.org](http://www.FloridaDisaster.org) and be prepared before June 1, the beginning of hurricane season.

## Why have salt water pools become so popular?

The answer isn't the absence of chlorine. Salt systems create their own chlorine. The answer is the absence of all the packaged chemicals and by-products in those chemicals.

## What is the cost benefit of a salt water pool?

They buy it for the increased swimmer comfort. After all, shouldn't the best thing about the pool be the water? So doesn't it just make sense to spend about \$1200 on the water quality. In the end, you get what you pay for. A little money spent on a salt water system will allow you to enjoy your swimming experience so much more. Acqua Nita Services is a Goldline Service Center.
